

Are clinical trials right for you?

Lung cancer treatment decisions, like clinical trials, can be complicated and sometimes difficult to understand. To help you understand if clinical trials are right for you, use the suggested questions to guide your conversation with your doctor.

Understand how clinical trials work.

- Can you explain to me how clinical trials work?
- What can I expect if I enroll in a clinical trial?*
- How does it differ from traditional care or treatment?
- What are the possible benefits to enrolling?

Understand where to find information on clinical trials.

- Are there any clinical trials that would be a good fit for me?*
- Do you recommend this specific clinical trial for me?

Understand my next steps.

- What are my next steps to learn more or get started?
- Who can I contact if I have questions?
